28-Nov-88	0	Date registered	F795 YRU	<i>Prior to current ownership</i>

Notes:

MOT data was obtained online from .GOV website. Where not available this was supplemented with information from MOT certificates, which have been retained.

Mileage before MOT in December 2020 was 75,858. Mileage on previous MOT certificate dated 19 September 2013 was 75,857. As the test station for the MOT in 2013 was 1 mile away it shows that the car wasn't used again until being submitted for the MOT in December 2020 (a SORN was in place).
