

Good afternoon

I am writing in connection with the investigation raised on the above vehicle registration.

The vehicle that you have check has a short digit VIN (Vehicle Identification Number), these are now usually 17 digits. Short VINs are not unique to one vehicle and can be associated with other vehicles/plant machinery, some of which may be subject to outstanding finance, stolen and insurance loss interests.

I can confirm that we have fully checked our records and can confirm that there are no alerts currently registered on the HPI **relating** to the vehicle registration **(K526OWS)** that you are checking.

I have contacted the DVLA and they have confirmed that the date of first registration is the 17th August 1993.

Therefore, we are unfortunately unable to amend your report. I hope this confirmation is of use to your enquiries. We apologise for any inconvenience caused.

Kind regards,

Mary J Mitchell
